Location: Chennai, Tamil Nadu, India

Career Objective

Motivated Information Technology student with hands-on internship experience in web development, backend operations, and team collaboration. Skilled in communication, coordination, problem-solving, and handling technical tools. Interested in contributing to learning administration and support operations while delivering high-quality service in a professional environment.

Internship Experience

1. Web Developer Intern - Jan 2026 – April 2026

El Codamics, Coimbatore

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, React.js, node.js, php, MySQL, Socket.IO, Tailwind, Rest API, Typescript
- Implemented REST API integration and CRUD operations for dynamic data handling
- Collaborated with backend developers to build scalable features using Node.js and Express.js
- Debugged and optimized application performance through testing and code improvements
- Used Git and GitHub for version control and collaborative development

2. Data Analytics, AI & Web Development Intern - May 2025

National Institute of Electronics and Information Technology

- Developed web applications using Python, Django, HTML, CSS and JavaScript
- Built REST APIs for data processing and backend communication
- Implemented CRUD operations for database management using MySQL
- Performed basic data analysis and visualization using Python libraries
- Tested APIs using Postman and improved backend performance

3. Web Designing Intern - Feb 2025

XploCode Infotech Private Limited, Madurai, India

- Designed responsive web pages using HTML5, CSS3 and Bootstrap
- Implemented modern UI components for better user experience
- Optimized website layout for mobile and desktop responsiveness
- Collaborated with developers to integrate frontend with backend APIs

Projects

1. School Management System | April 2026

- Developed a full-stack School Management System using HTML, CSS, JavaScript, and MySQL, php
- Implemented student management, attendance tracking, and CRUD operations
- Built responsive UI and integrated backend for smooth data handling
- Created admin features for managing student and academic records

2. AI Webcam OCR System | Dec 2025

- Developed an AI-powered OCR web application using Python and Flask for extracting text from webcam-captured images
- Integrated Doctr OCR and OpenCV for real-time image processing and text recognition
- Built responsive frontend interface using HTML and CSS
- Implemented image capture, preprocessing, and automated text extraction workflow
- Improved text detection accuracy using AI-based OCR models

3. Railway Booking System | May 2025

- Developed a web-based ticket reservation system using HTML, CSS, JavaScript and SQLite
- Implemented seat availability checking and booking management features
- Designed admin panel to manage bookings and view user booking history
- Implemented CRUD operations for ticket booking and database management

Certifications

- Completed Cloud Computing with *Elite Certification* – NPTEL
- Completed Build an Alarmed Motion Sensor – Infosys Springboard
- Completed Artificial Intelligence – Simplilearn
- Completed Data Science – Wipro

Technical Skills

- **Languages & Frameworks:** Python, Java, JavaScript, PHP, React.js, Node.js, Django
- **Frontend & Backend:** HTML5, CSS3, Bootstrap, REST API Development, CRUD Operations
- **Databases & Tools:** MySQL, MongoDB, SQLite, Git, GitHub, Postman, VS Code, Vercel
- **Platforms & Concepts:** Windows, Linux, Responsive Web Design, API Integration, Full Stack Development

Education

Bachelor of Technology – Information Technology (2026)

Nehru Institute of Engineering and Technology, Coimbatore Affiliated to Anna University
CGPA: 8.01

Higher Secondary Certificate (2022)

The TVS Matriculation Higher Secondary School, Madurai
Percentage: 68%

Secondary School Leaving Certificate (2020)

Sri Aurobindo Mira Matric Higher Secondary School, Madurai
Percentage: 82%

Achievements

- Presented and demoed live projects at technical symposiums
- Successfully built complete full-stack projects with backend and frontend
- Delivered responsive web design demos with real-time functionality

Languages Known

- English
- Tamil
